FAUCETS

Jaquar faucets provide a great experience with their high quality and high performance. Jaquar's in-house, award winning design team is well integrated in its approach and our state-of-the-art manufacturing units are backed by a world class testing lab. That's why Jaquar faucets conform to the highest quality and regulatory standards. Jaquar's passion for perfection reflects in the 10 years of warranty it extends on its faucets. Today, Jaquar faucets have about 60% of the market share with a complete range of single-lever, quarter turn and multi-turn faucets.

Cartridges

The heart of every faucet, the cartridge is responsible for controlling water supply.

- Jaquar cartridges are 5 lacs cycle tested to give a longer and trouble free operating life of upto 20 years (considering 60-70 operations per day)
- Wide angle of lever provides extra comfort and flawless, smooth operation
- Our cartridge spindle is made of brass instead of plastic, to avoid breakage
- Works smoothly even at high temperatures (85 degrees) and in various pressure conditions (0.5 -5 bar)
- Recognised and approved by national bodies NSF-USA, ASME-USA RAS-UK, ACS-FRANCE Aerators

Devices that mix air with water to give a soft and splash-free flow.

- Our integrated honeycomb-structured aerator, provides lime buildup protection
- Integrated anti-clogging dome screen of the aerator filters sediments and dust particles

Chrome Finish

Upper shiny protection layer provides a mirror finish to every faucet.

- High plating thickness (Nickel: 10 microns and Chrome: 0.3 microns) provides tolerance to extreme climate and water conditions
- 450+ hours of salt spray test ensures our finishes are highly durable and corrosion resistant for a much longer time.

i-FLUSH

Installed directly in the pipeline, the i Flush concealed flushing mechanism has multiple aesthetic and design advantages. It also provides a more appropriate mechanism of flushing, using the available water pressure to create better siphoning at the trap and superior clearing of waste.

i-Flush advantages

- Repeated flushing is possible, whereas concealed cisterns will definitely take time to fill up after flushing once
- i-Flush 32 mm can work efficiently at even low pressure (minimum 0.8 bar dynamics)
- Less noise in flushing
- Dual flush Saves water, a green product
- Easy maintenance, control stop valve can be closed with the help of a T-type key provided along with the product
- Access to control cartridge by removing front actuation plate hence easy accessibility for maintenance

Features

Advanced Rubit Technology

A feature that keeps showers clean and increases their longevity. Since the spray jets on the showers are made from elastic silicone, they ensure that no limescale deposits stick to the shower face. Even if they do, they can be easily rubbed off by hand or flannel.

Click Position System

All Jaquar multi-functional showers feature the convenient click mechanism. You can feel and hear the click while changing the function of the shower sprays.

Jaquar Booster Technology

Jaquar Booster Technology creates the sensation of a full shower regardless of the water pressure.

Thermo Insulation

Jaquar's insulated shower systems prevent scalding by not heating up the shower body.

WELLNESS

Stimulating Invigorating Restorative Welcome To The Rejuvenation Zone

SPAS

Spas are a wonderful way to relax and restore equilibrium. Jaquar's spa models are technological marvels whose 'well being circuits' comprise of various seats and a common footrest in the centre. Each seat is strategically fitted with different types of massage jets in various positions, oriented to massage different parts of the body. By moving from one seat to the other, one can enjoy a complete and satisfying massage that stimulates and relaxes all parts of the body. Cushioned headrests, ergonomic seats and a host of high performance features make this the ultimate home spa experience.

Why Jaquar Spas?

More economy

An array of energy efficient technologies make our spas more economical to run and easier to enjoy more often without worrying about power consumption.

Cleaner, healthier water

Unlike swimming pools, Jaquar spas don't use harsh chemicals that can be harmful for the skin. Our spas feature advanced water treatment technologies to ensure the cleanest, clearest water.

A superior experience

Jaquar spas have superior hydrotherapy performance and features that are usually reserved for the world's most expensive spas.

Guaranteed to last longer

SAUNAS

A Sauna is a bathhouse or room, usually made of wood, which uses dry heat to induce perspiration, with steam being produced by pouring water on heated stones. Perspiration or sweating is one of the main ways our bodies get rid of the traces of hundreds of toxins that accumulate inside us from pesticides, drugs and manmade chemicals. 15 minutes in a Jaquar sauna can help us sweat as much as we might otherwise do over an entire day or more. And the benefits of this aid in many medical conditions.

Why Jaquar Saunas?

Detoxification

Saunas stimulate the body to release fat-soluble toxins, heavy metals, and other toxic chemicals in sweat via pores more effectively than any other form of heat therapy or exercise. Reports have shown that it can relieve the symptoms of drug-induced lupus. The list of chemicals claimed to be removed from the body includes: mercury, lead, copper, cadmium, manganese, sodium, chloride, arsenic, nickel, benzenes, street drugs, prescription drugs, anaesthetics, cholesterol, urea, nicotine, sulfuric acid.

Immune System Enhancement

A typical sauna session will cause a brief 1 to 3 degree F increase in body temperature. Fever is the body's defence against bacteria, microbes and consequent infection. The production of white blood cells by the bone marrow and killer T cells by the thymus results in boosting immunity, overall.

Stress Relief

Continuous strain on the autonomic nervous system leads to a high level of stress, one of the elusive causes of many chronic diseases.

Pain Relief and Control

It helps in relieving muscular pain, cardivascular and other skin conditions

Skin Cleaning and Rejuvenation

Saunas open clogged pores allowing for removal of dirt, oil, and makeup. In addition, there are improvements in skin problems such as acne, rashes, burns, eczema and psoriasis. Scars, even keloids, may be gradually softened.

BUILT-IN BATHTUBS

The more common and practical choice in bathtubs, the built-in or 'drop-in' bathtub is preferred wherever space is at a premium. Because they are placed adjacent to a wall and tucked away, built-in bathtubs are space-economical and can also offer additional storage on the surrounding ledges or the walls next to them. Perfect for placing an aromatic candle or two while you soak in the bubble bath and unwind!
